Adult salmonids and rainbow smelt (freshwater, groups 1 and 2)

Species	Life Stage[a]	Sediment dose		Fish Response		Reference
		Exposure Concentration (mg/L)	Exposure duration (h)	SEV[b]	Description[c]	
Trout (Rainbow)	A	80000	24.00	10	No mortality	D. Herbert, personal communication to Alabaster & Lloyd (1980)
Trout (Rainbow)	A	160000	24.00	14	100% mortality	D. Herbert, personal communication to Alabaster & Lloyd (1980)
Salmon (Coho)	A	6779	72.00	7	Loss of habitat caused by excessive sediment transport	Coats et al. (1985)
Steelhead	A	6779	72.00	7	Loss of habitat caused by excessive sediment transport	Coats et al. (1985)
Trout (Brook)	A	4	48.00	3	Fish more active and less dependent on cover	Gradall & Swenson (1982)
Salmon	A	213	24.00	10	Abandoned traditional spawning ground	Hamilton (1961)
Trout (Sea)	A	213	24.00	10	Abandoned traditional spawning ground	Hamilton (1961)
Trout (Brown)	A	1000	8760.00	10	Reduced abundance	Herbert et al. (1961)
Trout (Brown)	A	60	8760.00	0	No adverse effect, healthy population	Herbert et al. (1961)
Trout (Brown)	A	1040	17520.00	8	Gill lamellae thickened (VFSS)	Herbert et al. (1961)
Trout (Brown)	A	1210	17520.00	8	Some gill lamellae became fused (VFSS)	Herbert et al. (1961)
Trout (Brown)	A	1061	8760.00	14	Population one-seventh of expected size (River Fal)	Herbert et al. (1961)
Trout (Brown)	A	5838	8760.00	14	Fish numbers one-seventh of expected (River Par)	Herbert et al. (1961)
Trout (Brown)	A	1061	8760.00	14	Deterioration of spawning gravel (River Par)	Herbert et al. (1961)
Trout (Brown)	A	5838	8760.00	14	Deterioration of spawning gravel (River Fal)	Herbert et al. (1961)
Trout (Brown)	A	59	8760.00	0	No adverse effect (River Camel)	Herbert et al. (1961)
Trout (Brown)	A	5838	8760.00	4	Diet shifted to terrestrial invertebrates	Herbert et al. (1961)
Trout (Brown)	A	1061	8760.00	4	Diet shifted to terrestrial invertebrates	Herbert et al. (1961)
Grayling (Arctic)	A	100	1008.00	8	Fish had decreased resistance to environmental stresses	McLeay et al. (1984)
Grayling (Arctic)	A	100	1008.00	9	Impaired feeding	McLeay et al. (1984)
Grayling (Arctic)	A	100	1008.00	9	Reduced growth	McLeay et al. (1984)
Trout (Rainbow)	A	18	720.00	10	Abundance reduced	Peters (1967)
Trout (Brown)	A	319	720.00	12	Decrease in population size	Peters (1967)
Trout (Brown)	A	18	720.00	10	Abundance reduced	Peters (1967)
Trout (Rainbow)	A	79	720.00	10	Abundance reduced	Peters (1967)
Trout (Brown)	A	79	720.00	10	Abundance reduced	Peters (1967)
Trout (Rainbow)	A	167	720.00	12	Abundance greatly reduced	Peters (1967)
Trout (Brown)	A	167	720.00	12	Abundance greatly reduced	Peters (1967)
Trout (Rainbow)	A	186	720.00	12	Abundance greatly reduced	Peters (1967)
Trout (Brown)	A	186	720.00	12	Abundance greatly reduced	Peters (1967)
Trout (Rainbow)	A	319	720.00	12	Abundance greatly reduced	Peters (1967)
Trout (Brown)	A	319	720.00	12	Abundance greatly reduced	Peters (1967)
Whitefish (Mountain)	A	10000	24.00	10	Fish died; silt-clogged gills	Langer (1980)
Salmon (Chinook)	A	650	168.00	5	No latent effects on homing in subsequent test at low SS (returned: 55%, control 56.9%)	Brannon et al. (1981)
Salmon (Chinook)	A	650	168.00	5	No histological signs of damage to olfactory sensory epithelium	Brannon et al. (1981)
Salmon (Chinook)	A	337	0.17	7	Preference for home water reduced, VA (45%, control 80%)	Brannon et al. (1981)
Salmon (Chinook)	A	0	0.17	3	Strong preference for clean home water (80%) over clean city water	Brannon et al. (1981)
Salmon (Chinook)	A	337	0.17	7	Less likely to move upstream, VA (35% moved upstream)	Brannon et al. (1981)
Salmon (Chinook)	A	337	0.17	4	Preference for home water with VA vs non-home water with VA (89%)	Brannon et al. (1981)
Salmon (Chinook)	A	337	0.17	0	No effect on elapsed time to move upstream	Brannon et al. (1981)

Species	Life Stage[a]	Sediment dose		Fish Response		Reference
		Exposure Concen-tration (mg/L)	Exposure duration (h)	SEV[b]	Description[c]	
Salmon (Chinook)	A	337	0.17	1	Quicker to enter city water vs home water (w/ and w/o VA)	Brannon et al. (1981)
Salmon (Chinook)	A	337	0.17	3	Preferece for non-turbid water (VA)	Brannon et al. (1981)
Salmon (Chinook)	A	337	0.17	5	Avoidance of sediment plume, increased zig-zagging across raceway (VA)	Brannon et al. (1981)
Salmon (Chinook)	A	337	0.17	5	Movement slowed in turbid water (VA)	Brannon et al. (1981)
Salmon (Chinook)	A	1204	96.00	12	50% mortality, in-stream (LC50)	Unk, Cited by Brannon et al. (1981)
Salmon (Chinook)	A	18722	96.00	12	50% mortality, static bioassay (LC50)	Unk, Cited by Brannon et al. (1981)
Salmon (Chinook)	A	337	0.17	7	May delay migratory/homing behavior	Brannon et al. (1981)
Grayling (Arctic)	A	187	24.00	8	Gill histopathologies (Hypertrophy, hypoerplasia and clubbing)of lamellae	Birtwell et al. (1984)
Fish	A	10000	24.00	9	Decreased and less diverse fish populations	Knapp (unpublished, cited by Birwell et al. (1984))
Grayling (Arctic)	A	100	24.00	0	Healthy population, all age classes	Knapp (unpublished, cited by Birwell et al. (1984))
Whitefish (Mountain)	A	100	24.00	0	Healthy population	Knapp (unpublished, cited by Birwell et al. (1984))
Grayling (Arctic)	A	10000	24.00	3	Downstream displacement	Knapp (unpublished, cited by Birwell et al. (1984))
Trout (Brown)	A	100	720.00	11	Population reduced	Scullion & Edwards (1980)
Trout (Brown)	A	100	720.00	8	Low condition factor	Scullion & Edwards (1980)
Trout (Brown)	A	110	720.00	8	Switched to primarily terrestrial invertebrate diet (97% diet)	Scullion & Edwards (1980)
Trout (Rainbow)	A	250	0.25	5	Rate of coughing increased (FSS)	Hughes (1975)
Trout (Rainbow)	A	100	0.25	5	Rate of coughing increased (FSS)	Hughes (1975)
Trout (Rainbow)	A	250	0.25	5	Rate of coughing increased (FSS)	Hughes (1975)
Trout (Rainbow)	A	600	0.25	5	Rate of coughing increased (FSS)	Hughes (1975)
Salmon (Sockeye)	A	1577	96.00	5	No respiratory distress observed	Servizi & Martens (1987)
Salmon (Sockeye)	A	1577	96.00	5	No histological or maked pathological effects on gills	Servizi & Martens (1987)
Salmon (Sockeye)	A	1577	96.00	8	Sediment particles observed between gill lamellae	Servizi & Martens (1987)
Salmon (Sockeye)	A	1577	96.00	8	Plasma glucose levels increased 150%	Servizi & Martens (1987)
Salmon (Sockeye)	A	508	96.00	8	Plasma glucose levels increased 39%	Servizi & Martens (1987)
Salmon (Sockeye)	A	1577	96.00	8	Significant increase in hematocrit levels	Servizi & Martens (1987)
Salmon (Sockeye)	A	1577	96.00	10	No mortality	Servizi & Martens (1987)
Salmon (Sockeye)	A	508	96.00	5	No respiratory distress observed	Servizi & Martens (1987)
Salmon (Sockeye)	A	508	96.00	10	Gill fungus caused mortality	Servizi & Martens (1987)
Salmon (Sockeye)	A	508	96.00	10	20% mortality (control 20%)	Servizi & Martens (1987)
Salmon (Sockeye)	A	508	96.00	5	No effect on leucocrit values	Servizi & Martens (1987)
Salmon (Sockeye)	A	508	96.00	8	Slight increase in hematocrit levels	Servizi & Martens (1987)
Salmon (Sockeye)	A	508	96.00	8	Signficant increase in plasma glucose	Servizi & Martens (1987)
Salmon (Sockeye)	A	508	96.00	5	No histological or marked pathological effects on gills	Servizi & Martens (1987)
Salmon (Sockeye)	A	508	96.00	6	Sediment particles observed between gill lamellae	Servizi & Martens (1987)
Salmon (Chinook)	A	650	168.00	7	Homing behavior improved (2 days, control 7 days)	Whitman et al. (1982)
Salmon (Chinook)	A	650	168.00	7	Homing behavior normal, but fewer test fish returned (20%, control 65%)	Whitman et al. (1982)
Salmon (Chinook)	A	650	168.00	7	Homing behavior impaired and delayed (3 days, control 2 days)	Whitman et al. (1982)
Salmon (Chinook)	A	650	168.00	7	Homing behavior normal, more test fish returned (70%, control 45%)	Whitman et al. (1982)
Salmon (Chinook)	A	650	168.00	7	Homing behavior improved (2 days, control 3 days)	Whitman et al. (1982)

Species	Life Stage[a]	Sediment dose		Fish Response		Reference
		Exposure Concen-tration (mg/L)	Exposure duration (h)	SEV[b]	Description[c]	
Salmon (Chinook)	A	650	168.00	7	Homing behavior normal, more test fish returned (75%, control 61%)	Whitman et al. (1982)
Salmon (Chinook)	A	350	0.17	7	Home water preference disrupted (80% home water, 20% city water)	Whitman et al. (1982)
Salmon (Chinook)	A	350	0.17	7	Home water preference disrupted (45% home water ash, 55% city water)	Whitman et al. (1982)
Salmon (Chinook)	A	350	0.17	7	Home water preference disrupted (89% home water w/ash, 11% city water w/ash)	Whitman et al. (1982)
Salmon (Chinook)	A	350	0.17	7	Home water preference disrupted	Whitman et al. (1982)
Salmon (Chinook)	A	650	168.00	7	Homing behavior normal, but fewer test fish returned	Whitman et al. (1982)
Trout (Rainbow)	A	20	0.02	3	Fish avoided turbid water (avoidance behavior, NTU)	Suchanek et al. (1984b)
Trout (Rainbow)	A	31	0.02	3	Fish avoided turbid water (avoidance behavior, NTU)	Suchanek et al. (1984b)
Grayling (Arctic)	A	20	0.02	3	Fish avoided turbid water (avoidance behavior, NTU)	Suchanek et al. (1984b)
Grayling (Arctic)	A	31	0.02	3	Fish avoided turbid water (avoidance behavior, NTU)	Suchanek et al. (1984b)
White (Round)	A	20	0.02	3	Fish avoided turbid water (avoidance behavior, NTU)	Suchanek et al. (1984b)
White (Round)	A	31	0.02	3	Fish avoided turbid water (avoidance behavior, NTU)	Suchanek et al. (1984b)
Trout (Rainbow)	A	20	0.02	3	Fish favored turbid water (NTU)	Suchanek et al. (1984b)
Trout (Rainbow)	A	31	0.02	3	Fish favored turbid water (NTU)	Suchanek et al. (1984b)
Grayling (Arctic)	A	20	0.02	3	Fish favored turbid water (NTU)	Suchanek et al. (1984b)
Grayling (Arctic)	A	31	0.02	3	Fish favored turbid water (NTU)	Suchanek et al. (1984b)
White (Round)	A	20	0.02	3	Fish favored turbid water (NTU)	Suchanek et al. (1984b)
White (Round)	A	31	0.02	3	Fish favored turbid water (NTU)	Suchanek et al. (1984b)
Trout (Rainbow)	A	31	0.02	3	Fish avoided turbid water (avoidance behavior, NTU)	Suchanek et al. (1984b)
Grayling (Arctic)	A	31	0.02	3	Fish avoided turbid water (avoidance behavior, NTU)	Suchanek et al. (1984b)
Salmon (Coho)	A	1600	96.00	10	Some fish died	Stober et al. (1981)
Salmon (Coho)	A	1600	144.00	10	Some fish died	Stober et al. (1981)
Salmon (Coho)	A	1600	192.00	10	Some fish died	Stober et al. (1981)
Salmon (Coho)	A	1429	48.00	10	Some fish died	Stober et al. (1981)
Salmon (Chinook)	A	1429	48.00	10	Some fish died	Stober et al. (1981)
Salmon (Steelhead)	A	1429	48.00	10	Some fish died	Stober et al. (1981)
Salmon (Coho)	A	1429	216.00	10	One fish died	Stober et al. (1981)
Trout (Lake)	A	3	21.00	3	Fish avoided turbid areas	Swenson (1978)
Trout (Brown)	A	4700	305.00	11	40% population reduction	Crosa et al. (2010)
Trout (Brown)	A	4700	305.00	10	15% biomass reduction	Crosa et al. (2010)
Trout (Brown)	A	4700	305.00	12	40% population reduction	Crosa et al. (2010)
Trout (Brown)	A	4700	305.00	13	66% biomass reduction	Crosa et al. (2010)
Trout (Brown)	A	3000	283.00	11	36% population reduction	Crosa et al. (2010)
Trout (Brown)	A	3000	283.00	12	50% population reduction	Crosa et al. (2010)
Trout (Cutthroat)	A	31	42.00	4	Feeding rate (on Chum salmon) decreased 19% (NTU)	Gregory & Levings (1996)
Trout (Cutthroat)	A	57	162.00	4	Feeding rate (on Chinook salmon) decreased 41% (NTU)	Gregory & Levings (1996)
Trout (Cutthroat)	A	29	42.00	4	Feeding rate (on Sockeye salmon) decreased 41% (NTU)	Gregory & Levings (1996)
Trout (Rainbow)	A	30	1176.00	0	No observable effect	Water Research Center (1961)
Trout (Rainbow)	A	30	1176.00	0	No observable effect	Water Research Center (1961)

Species	Life Stage[a]	Sediment dose		Fish Response		Reference
		Exposure Concentration (mg/L)	Exposure duration (h)	SEV[b]	Description[c]	
Trout (Rainbow)	A	90	1176.00	10	Some fish died	Water Research Center (1961)
Trout (Rainbow)	A	90	1176.00	10	Some fish died	Water Research Center (1961)
Trout (Rainbow)	A	270	1176.00	12	Mortality rate 50%	Water Research Center (1961)
Trout (Rainbow)	A	270	1176.00	12	Mortality rate 50%	Water Research Center (1961)
Trout (Rainbow)	A	270	1176.00	8	Epithelial cells thickened	Water Research Center (1961)
Trout (Rainbow)	A	270	1176.00	8	Epithelial cells thickened	Water Research Center (1961)
Trout (Rainbow)	A	270	1176.00	8	Lamellae fused in gills	Water Research Center (1961)
Trout (Rainbow)	A	270	1176.00	8	Lamellae fused in gills	Water Research Center (1961)
Trout (Rainbow)	A	270	1176.00	8	Fin-rot occurred in some fish	Water Research Center (1961)
Trout (Rainbow)	A	270	1176.00	8	Fin-rot occurred in some fish	Water Research Center (1961)
Trout (Brown)	A	0	744.00	0	Population density 20/1000 ft^3	Water Research Center (1961)
Trout (Brown)	A	60	744.00	0	Population density 20/1000 ft^3	Water Research Center (1961)
Trout (Brown)	A	1000	744.00	9	Population reduced 1/3	Water Research Center (1961)
Trout (Brown)	A	6000	744.00	9	Population reduced 1/20	Water Research Center (1961)
Trout (Rainbow)	A	8	1.00	0	No behavioral effects	Barrett et al. (1992)
Trout (Rainbow)	A	45	1.00	4	Reactive distance decreased 35%	Barrett et al. (1992)
Trout (Rainbow)	A	97	1.00	4	Reactive distance decreased 55%	Barrett et al. (1992)
Trout (Brook)	A	8	24.00	0	No change in home water preference	DeVore et al. (1980)
Trout (Brook)	A	41	24.00	0	No change in home water preference	DeVore et al. (1980)
Steelhead	A	75	168.00	7	Reduced quality of rearing habitat	Slaney et al. (1977b)
Trout (Rainbow)	A	75	168.00	7	Reduced quality of rearing habitat	Slaney et al. (1977b)
Trout (Rainbow)	A	59	2232.00	10	Habitat damage; reduced porosity of gravel	Slaney et al. (1977b)
Salmon	A	16	24.00	4	Feeding behavior apparently reduced	Townsend (1983), Ott (1984)
Salmon (Atlantic)	A	2500	24.00	10	Increased risk of predation	Gibson (1933)
Trout	A	16	24.00	4	Feeding behavior apparently reduced	Townsend (1983), Ott (1984)
Trout (Cutthroat)	A	35	2.00	4	Feeding ceased; fish sought cover	Cordone & Kelly (1961)
Trout (Rainbow)	A	17500	168.00	8	Fish survived; gill epithelium proliferated and thickened	Slanina (1962)
Salmon	A	25	4.00	4	Feeding activity reduced	Phillips (1970)
Grayling (Arctic)	A	31	0.02	3	Fish avoided turbid water	Suchanek et al. (1984a, 1984b)
Trout (Rainbow)	A	31	0.02	3	Fish avoided turbid water (avoidance behavior)	Suchanek et al. (1984a, 1984b)
Trout (Rainbow)	A	30	600.00	3	Modified feeding behaviour	Becke et al. (2017, data pulled from Courtice et al. (2022))
Trout (Brown)	A	300	1104.00	10	Density drop average 5%	Espa et al. (2019, data pulled from Courtice et al. (2022))
Trout (Brown)	A	300	1272.00	12	Density drop average 60%	Espa et al. (2019, data pulled from Courtice et al. (2022))
Trout (Brown)	A	800	960.00	9	Density drop average 0%	Espa et al. (2019, data pulled from Courtice et al. (2022))
Trout (Brown)	A	4700	312.00	9	Density drop average 0%	Espa et al. (2019, data pulled from Courtice et al. (2022))
Trout (Brown)	A	3000	288.00	10	Density drop average 20%	Espa et al. (2019, data pulled from Courtice et al. (2022))
Trout (Brown)	A	3500	312.00	9	Density drop average 0%	Espa et al. (2019, data pulled from Courtice et al. (2022))

[a]A = adult; E = egg; EE = eyed egg; F = fry; F* = swim-up fry; FF = young fry (<30 weeks old); FF* = older fry (>30 weeks old); J = juvenile; L = larva; PS = presmolt; S = smolt; SF = sac fry; U = underyearling; Y = approximate yearling; YY = young of the year

[b]Severity-of-ill-effect ranging from 0 (no detectible effect) to 14 (maximum effect; see Table 1)

		Sediment dose			Fish Response	
Species	Life Stage[a]	Exposure Concen-tration (mg/L)	Exposure duration (h)	SEV[b]	Description[c]	Reference

[c]Panicle sizes of suspended sediment (SS) sometimes were given categorically in source documents. As abbreviated here. VFSS = very fine (<15 um); FSS = fine (15-74 um); MFSS = medium to fine (75-149 um); MCSS = medium to coarse (150-290 um); and CSS = coarse (180-740 um). Usual 'sediments' used: BC = bentonite clay; CS = calcium sulfate; CWS = coal washery solids; DE = dtatomaceous earth; DM = drilling mud (nontoxic); FC = fire clay; FE = fuller's earth; IA = incinerator ash; KC = kaolin clay; KS = Kingston silt; LNFH = lime-neutralized ferric hydroxide; MC = montmorillonite clay; VA = volcanic ash; WF = wood fibers. Other abbreviation: NTU = nephelometric turbidity units.
